KENTISH DOWNS POLL DORSET STUD

Flock 336 Est. 1960

Certificate 82271 | Gudair Vaccinated

Welcome

We are delighted to welcome returning clients and new buyers to Collingullie on **Wednesday, 4 November, 2026** for our annual ram lamb sale. Thank you for your interest in our breeding program and for the confidence you place in Kentish Downs genetics.

Our breeding direction remains clear: to produce practical, productive Poll Dorset rams that help commercial lamb producers improve profitability. We combine a strong focus on structure and soundness with rigorous performance recording and continued investment in genetics that deliver growth, muscle and carcase value.

This year's catalogue brings together 200 ram lambs, all genomically tested and raised entirely on grass. With an average **TCP index of 163.05,** placing the group within the **top 10% of the Lambplan database** for terminal genetics. The offering reflects the depth and consistency we are building across our flock.

We are particularly excited to offer sons of **Pepperton 240281**, alongside progeny from established and emerging Kentish Downs sires. For a list of aour 2026-2027 Sires see page 11. The catalogue provides choices for a range of breeding objectives, from lifting growth and saleable carcase weight to improving muscling, yield and eating quality.

Our Sheep Genetics 5-Star Data Quality rating underpins our commitment to providing reliable information. We encourage you to discuss your flock, target markets and breeding priorities with us so we can help identify the rams best suited to your enterprise.

Please join us for inspections from 10.30am, complimentary morning tea and lunch from midday, ahead of the auction at 1.00pm. For those unable to attend, live bidding will be available through AuctionsPlus.

Thank you to our dedicated team, industry partners and clients for your continued support. We look forward to welcoming you on sale day.

Craig and Karen Wilson and family
Kentish Downs Poll Dorset Stud

Thank you to our clients, partners, and team for your continued support and commitment. Together, we're building stronger genetics and a more profitable future for the Australian lamb industry.

Why Kentish Downs?

Confidence in the genetics. Focused on your profitability.
Choosing a a good ram isn't a cost, its an investment. At Kentish Downs, we combine rigorous performance recording, carefully selected genetics and a practical commercial focus to help you breed productive, profitable lambs.

Data you can trust
Our Sheep Genetics 5-Star Data Quality rating reflects the care we take with recording. With our entire flock DNA recorded and birth weights measured, we invest in the information behind our ASBVs so you can select with greater confidence.

Progress where it counts
Our breeding program has delivered sustained improvement in growth and eye muscle depth. We focus on genetics that help commercial producers turn feed into saleable kilograms and meet market specifications.

Selection beyond the numbers
We place importance on structure, soundness and doing ability alongside genetic merit. Our aim is to breed practical, functional rams suited to the demands of commercial lamb production.

Performance put to the test
Our involvement in progeny evaluation helps us assess how genetic predictions translate into growth and carcase performance under commercial conditions.

A clear breeding direction
We continually invest in carefully selected sires and the depth of our ewe flock, building on each generation's progress to offer our clients stronger genetic choices.

Genetic merit matters to your bottom line.

A cheaper ram isn't always a cheaper investment. Choosing a ram without high-performing genetics can cost you through slower growth, longer finishing times and missed carcase value.

Across hundreds of lambs over a ram's working life, those differences add up.

Investing in superior genetics backed by reliable data is an investment in your flock's earning potential.

2026 Ram Lamb Performance Summary

The 2026 Kentish Downs Ram Lamb Sale presents **200 performance-recorded** Poll Dorset rams, combining growth, carcase performance and profitability in a powerful offering for commercial prime lamb producers.

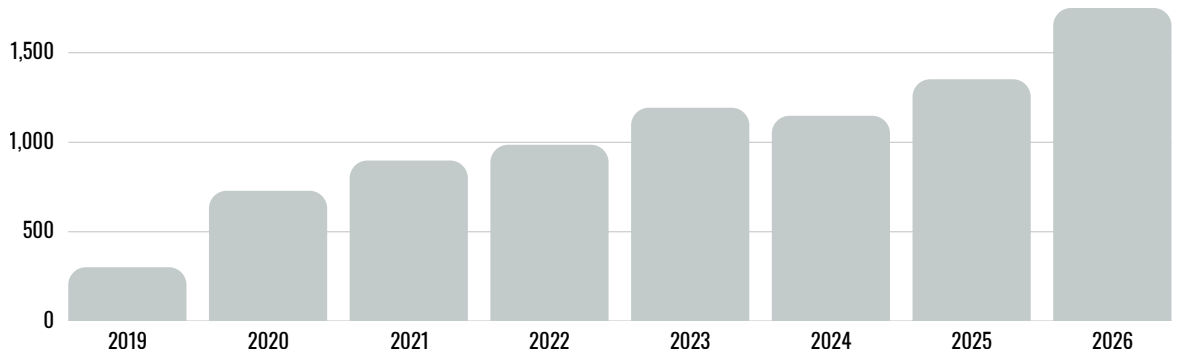

At the top end of the catalogue, **TCP reaches 176.2, PWT 23.4, CWT 9.00 and PEMD reaches an exceptional 6.5, well above the current Top 1% industry threshold**. Tabled below is a summary of the average ASBV data for the 200 ram lambs on offer on the 4th November, 2026. All rams are 100% grass-fed. See page 28 for Lambplan percentile band table.

ASBV	KENTISH DOWNS 200 LOTS AVERAGE	PERCENTILE BAND
TCP Index	163.05	TOP 10%
Eating Quality Index	156.25	TOP 20%
Post Weaning Weight	18.13	TOP 20%
Post Weaning Eye Muscle Depth	4.04	TOP 10%
Carcase Weight	7.30	TOP 10%
Lean Meat Yield	4.18	TOP 20%
Dressing Percentage	3.57	TOP 10%

Year-On-Year Genetic Gain

Source: Sheep Genetics, 15/08/26.

For seven consecutive years, Kentish Down Poll Dorset Stud's breeding program has achieved consistent genetic gain in both Eye Muscle Depth and Post Weaning Weight, delivering rams with faster growth rates and superior carcase yield.

Kaz's Top Ram Lamb Sale Picks

LOT 4 — 260192
Leading growth genetics
The catalogue's highest **PWT at 23.4**, supported by **WWT 14.4** and **CWT 8.8**. A clear feature for producers prioritising growth and carcase weight.
Sire: H 230087.

LOT 12 — 260719
Carcase weight standout
Leads the catalogue for **CWT at 9.0**, alongside **PWT 22.0**, **LMY 5.7** and TCP **169.1.** Combines strong growth with genetic potential for heavier, higher-yielding carcases.
Sire: KD 250035.

LOT 15 — 260700
Exceptional lean meat yield
The highest **LMY in the catalogue at 6.6**, combined with the third-highest **TCP at 175.2** and **EQ 166.0.** A strong feature for buyers targeting saleable meat yield.
Sire: Pepperton 230321.

LOT 40 — 260106
High index with lower birth weight
The second-highest **TCP at 175.4**, with **BWT 0.22**, **PEMD 5.4** and **LMY 5.7.** An appealing combination of relatively low birth-weight genetics, muscle and yield.
Sire: Pepperton 240281.

LOT 117 — 260082
The catalogue's highest TCP
Leads the offering with **TCP 176.2**, supported by **PWT 19.9**, **CWT 8.3** and **LMY 6.4**. A headline son of Pepperton 240281 combining growth and carcase merit.
Sire: Pepperton 240281.

lOT - 136 — 260501
Leading eating quality index
The catalogue's highest **EQ at 170.4**, paired with **TCP 172.4**, **PEMD 5.5** and **BWT 0.28**. A strong option to feature for its combination of eating quality index, muscling and lower birth weight.
Sire: KD 250035.

172 — 261047
Muscle and dressing percentage
Leads the catalogue for **DRESS at 4.6**, with **PEMD 6.2, TCP 171.6** and **BWT 0.16.** A distinctive combination of strong carcase traits and lower birth-weight genetics.
Sire: KD 250071.

LOT 191 — 261204
The catalogue's muscle leader
The highest PEMD at 6.5, supported by DRESS 4.4, BWT 0.22 and TCP 164.5. A feature for buyers specifically seeking to lift muscling.
Sire: KD 241195.

Choose Your Breeding Objective

Breeding priority	Traits to consider together
Lift growth	**WWT and PWT, alongside birth weight**
Increase carcase weight	**CWT and growth traits**
Improve muscling and yield	**PEMD, LMY and DRESS**
Put more emphasis on eating quality	**EQ and IMF, alongside production traits**
Moderate birth weight	**BWT, considered with growth and the ewe flock being joined**

Pepperton 240281
Sets New Benchmark in LAMBPLAN History

An extraordinary milestone in terminal sire genetics has been achieved, with Pepperton 240281 recording the highest Terminal Carcase Production (TCP) index in the history of LAMBPLAN.

The latest LAMBPLAN analysis has placed Pepperton 240281 in uncharted territory, achieving an exceptional **TCP index of 193.2.** Across the LAMBPLAN Terminal database of more than three million sheep, no other animal has reached this level, with the next highest recorded TCP index sitting at 188.9.

We were delighted to secure this outstanding sire at the Pepperton Stud dispersal, recognising his exceptional genetic potential and impressive raw performance data for muscle, fat and post-weaning weight. The latest analysis has now confirmed that potential through his Australian Sheep Breeding Values (ASBVs).

Following his arrival at Kentish Downs, Pepperton 240281 was naturally joined as part of our progeny testing program, with approximately 100 lambs expected from his 2026 matings.

His exceptional genetic merit makes him an exciting addition to our breeding program, and he will be used extensively throughout our 2026/27 joining season.

Importantly for our clients, we anticipate offering the majority of his 2026-drop sons at our **Annual Ram Lamb Sale on Wednesday, 4 November 2026,** providing an opportunity to access genetics from this record-breaking sire.

This achievement reinforces our commitment at Kentish Downs to identifying, investing in and delivering elite genetics that drive measurable improvements in commercial lamb production.

We extend our sincere congratulations to the Trewick family of Pepperton Stud for breeding such an extraordinary animal. Their dedication to genetic improvement has produced a sire that has set a remarkable new benchmark for the Australian sheep industry.

Our commitment to rigorous performance recording has earned **Kentish Downs a 5-Star Sheep Genetics Data Quality rating,** giving buyers confidence that our ASBVs are underpinned by high-quality data and provide the best possible prediction of genetic performance.

TCP - *"The money making index"*. TCP is represented in economic terms with a unit increase in the index reflecting an additional dollar per ewe joined per year. The index focuses on increasing weight and muscle while reducing carcase fat.

EQ - The EQ index targets improvement of terminal sire performance in prime lamb production systems. EQ balances large improvements in eating quality with modest increases in lean meat yield.

BWT - A measure of the genetic difference between animals' live weight at birth. Rams with more negative BWT produce lambs that are lighter at birth. Industry average sits at 0.4.

WWT - A measure of genetic value for growth. A higher WWT ram will produce faster growing progeny during the first 100 days. A higher early growth rate will benefit those producers who market their lambs at weaning. A high WWT is highly correlated to PWT.

PWT - A measure of genetic value for growth. A higher PWT ram will produce faster growing progeny over 225 days. A higher post weaning weight will benefit those producers who sell as trade or keep their lambs for longer to target the export market.

PEMD - A measure of the value of the animals genes for muscling. A higher PEMD ram will have more muscle in the high value loin area and hind quarter. A high PEMD contributes to a better overall carcase shape.

PFAT - A measure of the value of the animals genes for fat. The more negative the value for PFAT, the leaner the progeny will be.

IMF - A measure of the chemical fat percentage in the loin muscle of a lamb and is often referred to as marbling. Rams with more positive IMF produce progeny with more intramuscular fat.

LMY - A measure of the genetic difference between animals for the amount of lean meat yield derived from the carcase and is expressed as a percentage. A higher LMY ram will produce lambs that have a higher lean meat yield percentage at slaughter.

CWT - A measure of the genetic difference between animals in carcase weight.

Kentish Downs 2026-2027 Sire List

Our 2026–2027 sire team reflects our continued investment in genetics that drive commercial lamb profitability. Combining proven Pepperton bloodlines with an exciting selection of Kentish Downs sires, the team averages an TCP of 177.1, with average eye muscle depth, lean meat yield and dressing percentage also ranking in the industry's top 1%. Strong growth and carcase weight complement these strengths, alongside an average Eating Quality Index of 168.7. Leading the team is Pepperton 240281, with a standout TCP of 193.2 and PEMD of 7.7. Together, these sires provide a strong foundation for the next generation of Kentish Downs rams, reinforcing our focus on producing lambs with the genetic potential to grow efficiently and deliver greater carcase value.

Sale Information

SALE DATE AND INSPECTION TIME
Kentish Downs Poll Dorset Ram Lamb Sale, Wednesday 4th November, 2026. Undercover shelter is provided and air-conditioned auction room. Please note new venue details.

10.30am - Inspection
Rams may be inspected from 10.30am on the morning of the Sale, or at any other time by arrangement with the agents or vendors.

1.00pm - Kentish Downs Poll Dorset Stud Ram Lamb Sale
200 Poll Dorset Rams. Auction will be live auction on-site and interfaced with AuctionsPlus.

SELLING SYSTEM
Sale of the rams will be conducted under normal auction conditions on-site. Online sale of the rams will be conducted by AuctionsPlus with live bidding (NOT Helmsman). Please check with the Selling Agents to obtain a buyers number if you are considering making a purchase. Successful purchasers are requested to give written advice to the Selling Agents regarding transport arrangements at the conclusion of the Sale.

TRAVEL, ACCOMMODATION AND DINING
Wagga Wagga offers a wide range of hotels and motels. For convenient access to the sale at Collingullie, we recommend choosing accommodation on the western side of the city.

TRANSPORT
Free delivery within 100km, unless other arrangements have been made.

No deliveries will be made whilst the auction is in process. At the conclusion of the sale, rams may be taken.

AGENTS
Agents are required to introduce their buyer prior to the sale via email.

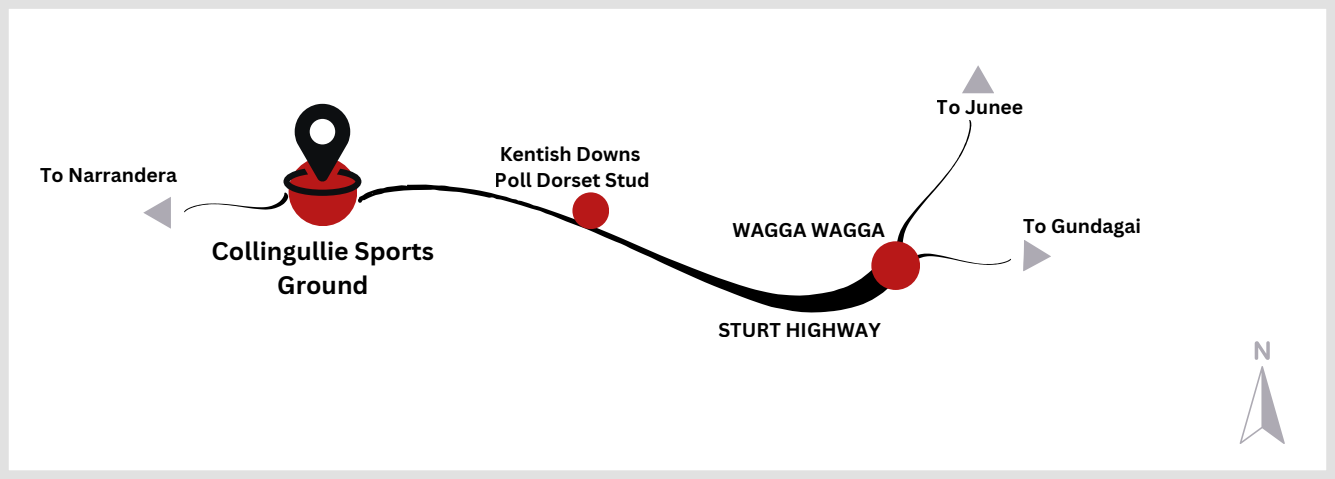

A 3% rebate to all agents who attend with or on behalf of existing Kentish Downs clients, and settle within 7 days.

A 5% rebate to all agents who attend with or on behalf of new clients and settle within 7 days.

RIGHTS
Kentish Downs Poll Dorset Stud retains 100% semen marketing rights of any ram purchased at this sale. For any studs wishing to purchase a stud ram, the base price will begin at $5,000. This needs to be disclosed to a selling agent prior to the Auction.

WARRANTY
All rams are guaranteed for structure and soundness. The guarantee does not cover bad management; a vet certificate is required before a replacement ram is provided.

HOW TO GET TO THE SALE
Collingullie Sports Ground
10 Kennedy St, Collingullie NSW 2650
From Wagga Wagga take the Sturt Highway and head west toward Narrandera. Collingullie is approximately is 24 kilometres west of Wagga Wagga. When you reach Collingullie turn left onto Macdonnell St and drive straight to the Collingullie Sports Ground.

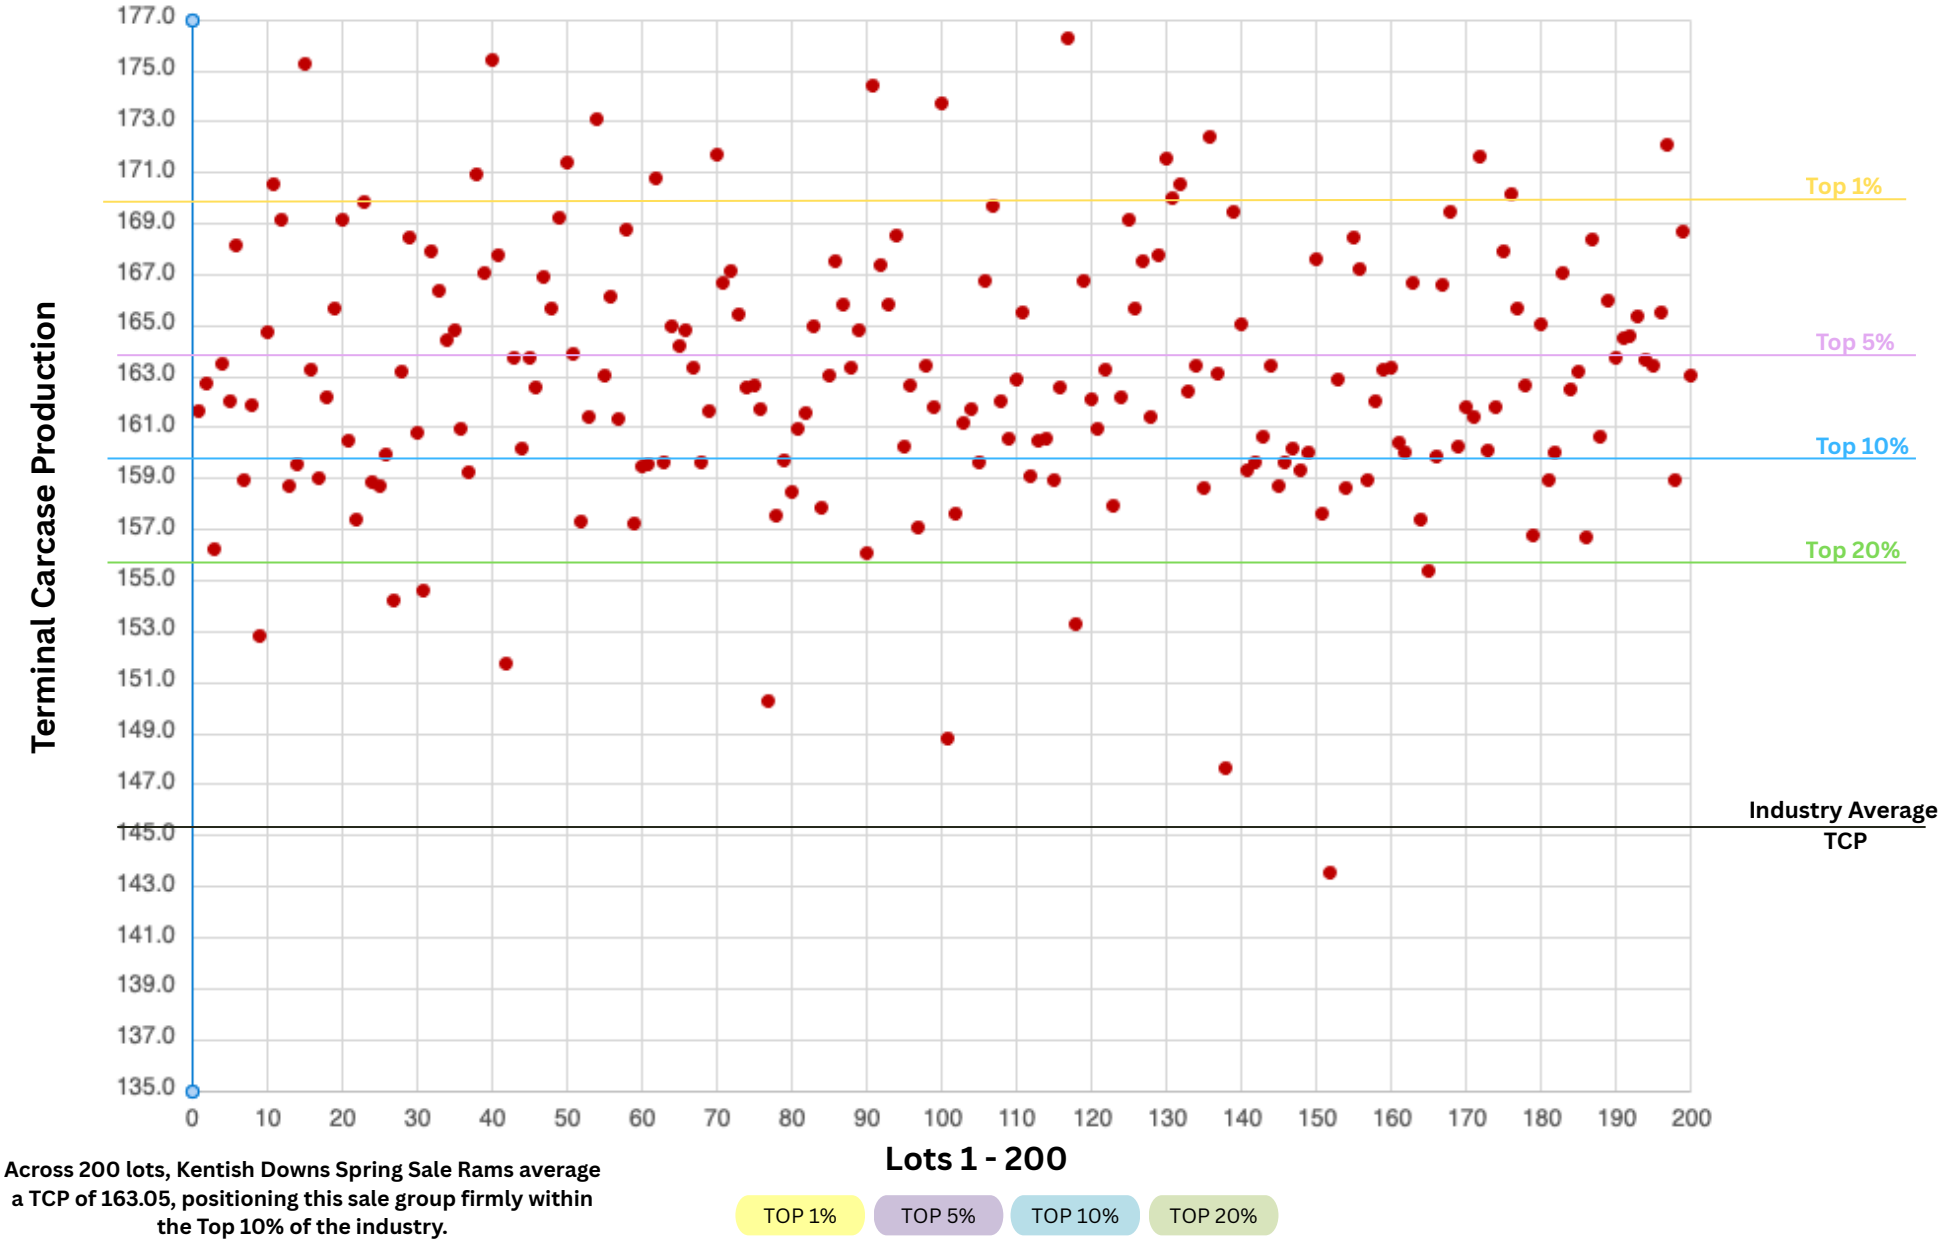

ONLINE BIDDING
Bidding is available online through AuctionsPlus.

FOR BUYERS UNABLE TO ATTEND ON THE DAY
If you are unable to attend the sale, please get in touch with Nutrien agents listed at the front of the catalogue or Craig Wilson. We are more than happy to assist with any remote purchases or provide additional information.

CATERING
Join us for a complimentary morning tea and lunch, with lunch served from midday.

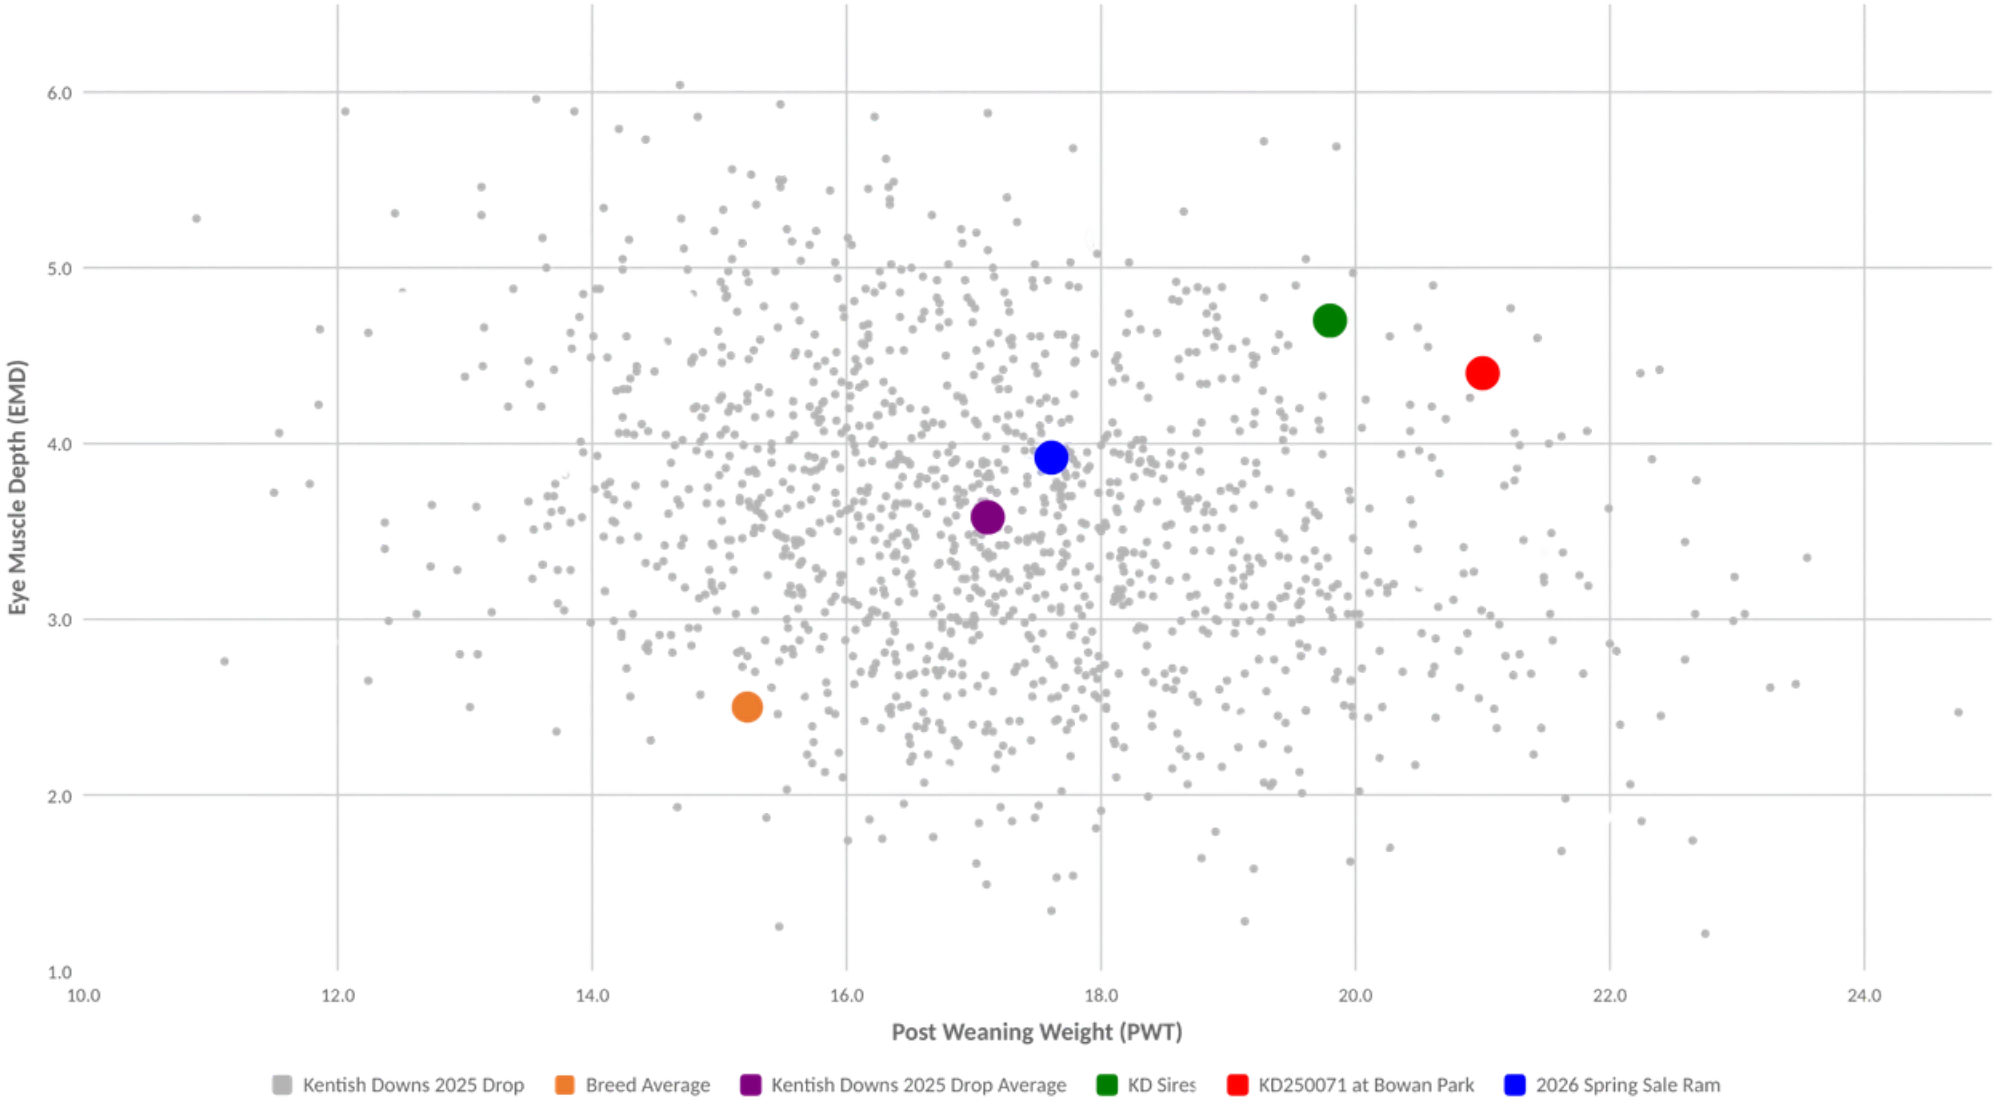

ACCESSIBILITY
The sale venue is wheelchair accessible.

Terminal Carcase Production - 200 Lots - 2026 Ram Lamb Sale
Where Data Delivers Profit.

Across 200 lots, Kentish Downs Spring Sale Rams average a TCP of 163.05, positioning this sale group firmly within the Top 10% of the industry.

Kentish Downs Position for Post-Weaning Weight and Eye Muscle Depth

The graph above demonstrates the strong genetic progress being achieved within the Kentish Downs Poll Dorset breeding program for both Post Weaning Weight (PWT) and Eye Muscle Depth (EMD). The **Kentish Downs 2025 drop average** sits well above the breed average for both traits, indicating that these lambs are genetically positioned to produce greater growth and increased muscling.

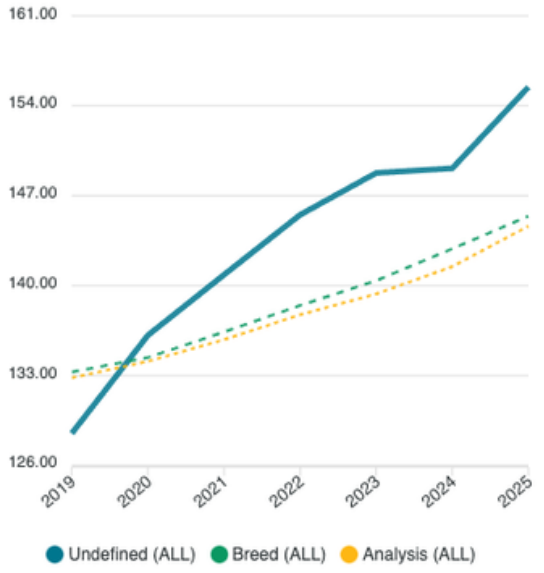

The **Kentish Downs sires** are located further toward the upper-right section of the graph, reflecting their combination of high growth and superior eye muscle depth. The highlighted 2026 Spring Sale rams also performs above both the breed and Kentish Downs drop averages, demonstrating a desirable balance of growth and carcase attributes.

KD250071's result at Bowan Park Progeny Research Trial provides further evidence of this performance, recording particularly high PWT while maintaining strong EMD. Overall, the graph shows that Kentish Downs is successfully breeding sheep that combine faster growth with improved muscling. Traits that can contribute to heavier, better-yielding and potentially more profitable lambs.

Kentish Downs Poll Dorset Stud Genetic Trends 2019 - 2025

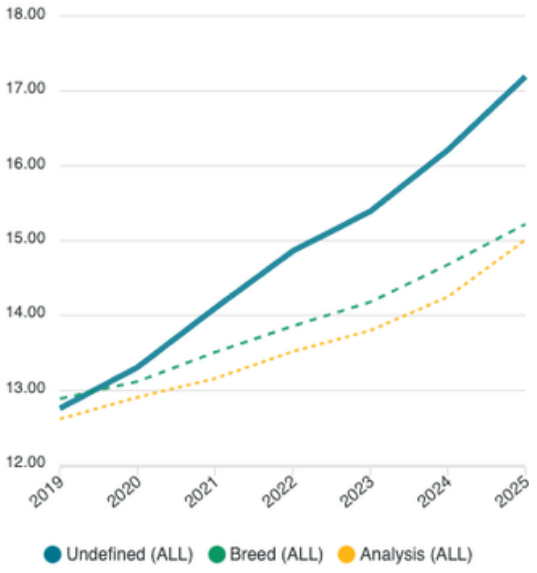

TCP

Terminal Carcase Production Index average per year

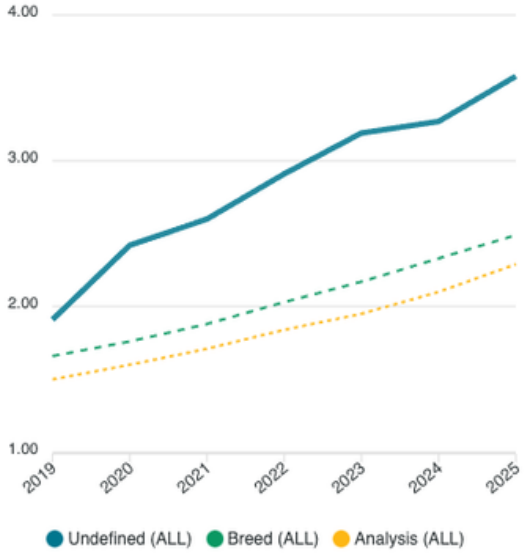

PWT

Post Weaning Weight average per year

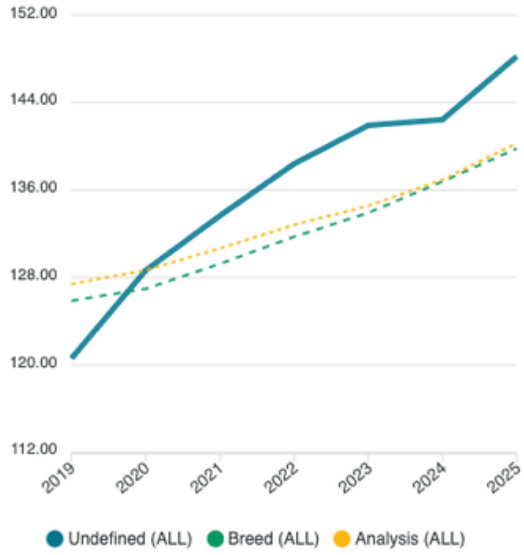

PEMD

Post Weaning Eye Muscle Depth average per year

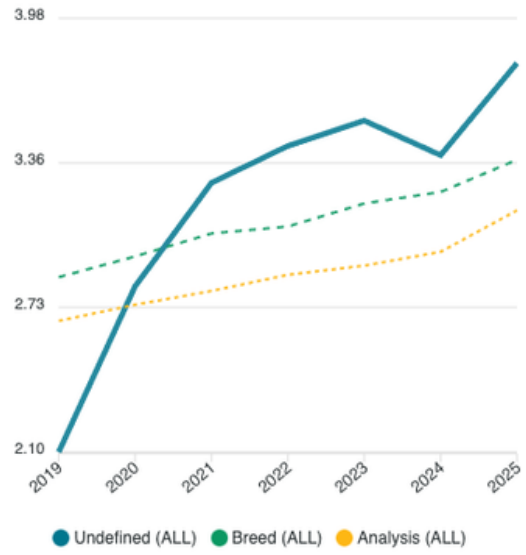

EQ

Eating Quality Index average per year

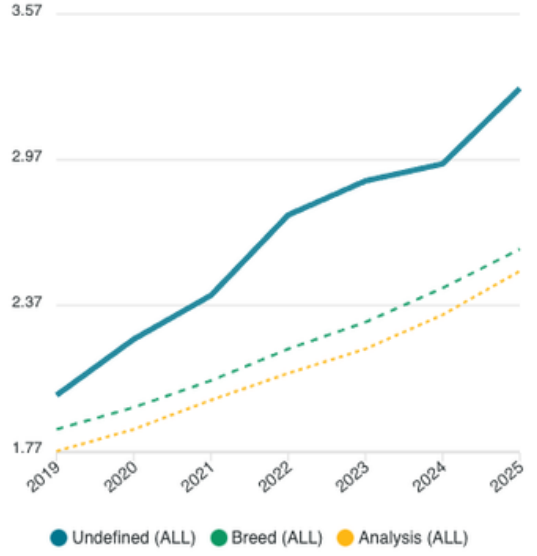

LMY

Lean Meat Yield average per year

DRESS

Dressing Percentage average per year

Located on the banks of the Murrumbidgee River near Wagga Wagga, NSW, **Kentish Downs Poll Dorset Stud** is proudly family-owned, where dedication, innovation, and care for the land come together.
